💼 WORK EXPERIENCE

Flutter Developer   08-2024 – 08-2024
Lothga ⧉   Jeddah, Saudi Arabia, SA

During the development of the "LothgaTablet" project:
- Developed the project's core and kernel features.
- Constructed a foundational system to support the application.
- Implemented an audio system to enhance user experience.
- Created a central database to integrate all games into a cohesive system.
- Enabled parental oversight of children's progress and provided extensive control over game content, including questions and visuals.

📂 PROJECTS

Tadamon App   05-2024 – present
Flutter
- Designed an application to verify product barcodes and screen companies for ethical concerns.
- Implemented machine learning algorithms for image analysis.
- Developed features to enhance reliability and ethical checks.
- Focused on identifying support for colonial entities and organizations engaged in activities against humanity.
- App images are available for viewing here.
- The application can be downloaded here.

XO-Game ⧉   05-2024 – 05-2024
Flutter
- Developed a simple tic-tac-toe (XO) game using Flutter.
- Implemented core game logic and user interface.
